

## products affected: all DR models and the DS100C models

In the 2007 catalog you will notice that all DR and DS100C models have new part numbers. **Except for the two cases noted below**, these new part numbers should be used when placing orders for DR models and DS100C models.

## first exception: replacements for existing devices

Special part numbers must be used when ordering DR's and DS100C's that must mate with existing devices rated at 125V, 250V, 347V or 600V. In these cases, please do not use the part numbers published in the catalog; instead use the part numbers provided in the **"for mating with existing devices"** column of the attached reference tables or advise customer service that the devices must mate with existing units and they will provide the proper part numbers.

## second exception: DR250 devices

The part numbers in the 2007 catalog are incorrect for the DR250 devices that are rated at 125V, 250V, 347V and 600V. When ordering these devices, please do not use the part numbers in the 2007 catalog; instead use the part numbers highlighted in the attached reference tables. Please contact customer service with any questions.

# Part Number Reference
