

New Padlockable Pawls on DS/DR/DN

product improvement description

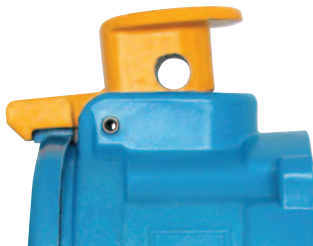

Lock/pin are not provided

Effective immediately on all DS, DR and DN Series receptacles the -843 receptacle option will no longer utilize a padlockable mushroom pawl; instead, it will utilize a padlockable standard pawl. The padlockable mushroom pawl will still be available but it must be ordered differently: instead of using the -843 suffix you must use the -375-843 suffix. This change provides a significant cost saving option for our customers.

description of old -843 option vs new -843

OLD

Previously when ordering DS/DR/DN models with the -843 option a Padlockable Mushroom Pawl was provided.

NEW

Now when ordering DS/DR/DN models with the -843 option, a padlockable standard pawl is provided.

padlockable mushroom pawl availability

The Padlockable Mushroom Pawl is still available but it must be ordered differently.

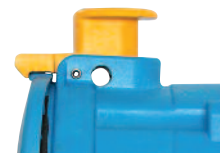

OLD

~~Previous suffix
-843~~

No longer provides the mushroom type pawl

NEW

**New suffix
-375-843**

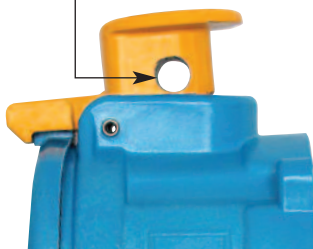

Will provide the mushroom pawl with the lockout hole

additional related change: hole location

The hole location on all padlockable pawls will be changing as shown below. This change affects all product lines that utilize the padlockable mushroom pawl including DSN.

OLD

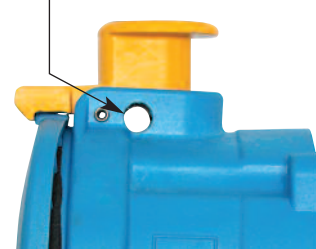

Old hole location

Drilling a lockout hole thru the mushroom pawl was very difficult to align properly

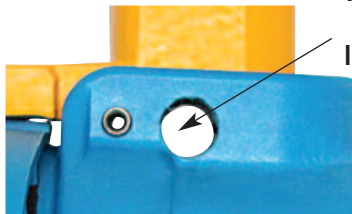

NEW

New hole location

OBSOLETE

important note: lock hole size

Hole for
5/16"
lock/pin

Meltric's padlockable pawl and padlockable mushroom pawls are drilled to accommodate a standard 5/16" diameter lock or pin. DO NOT substitute a smaller diameter lock or pin.
